Beaumont Well Looks Promising

Several Wells Near Wainwright at Interesting Stage

Wednesday the crew at the new Beaumont well, on L. S. 1 of Section 10-45-7-w4th, about three miles North West of Wainwright, spent most of the day bailing the oil that had been released when the well was drilled in on Tuesday. The oil sand in this well was located at the depth of 2183 feet when the casing was cemented in at this depth. The oil that is being produced is absolutely free from water and is apparently of a high grade; and should find a ready sale at the local refineries. Mr. Frank Stevens, who has had charge of the drilling of this well is highly pleased with the result of his efforts. Good time was made on this well which was finished within twenty days actual drilling time. Wednesday Mr. Elliott, of the Department of the Interior was at the well to make his official inspection which we understand was entirely satisfactory. Wednesday, Mr. Stevens, would not make a definite estimate of the probable production of the new well till further bailing had been made, however he assured us that the new well was one of the best that had been completed in the Wainwright field.

ADMIRAL DRILLING IN LIME

The Admiral well which passed up the first promising oil sand is now working in the limestone below the 2600 foot level. Slow progress was made in the hard formation till a new roller bit was secured since which time better progress is being made. This well is being watched closely by many who believe that a very high grade oil will be found below or in the limestone which till now has never been tested. This company deserves a lot of credit for pioneering the drilling of this formation and if their efforts are successful in bringing in a bigger and better well, here's hoping they will get a good one.

BETH-WAIN NEARING SAND

The drillers at Beth-Wain northwest of Wainwright expect to reach the first oil sand by the end of this week. The casing will be cemented and a test made.

CHURCH NOTICES AND ACTIVITIES

UNITED CHURCH NOTES

The Rev. J. R. Geeson and family returned from Edmonton where they were in attendance at the school of Religion. They report having an instructive as well as inspiring service. The services next Sunday will be at 10:30, Alma Mater, Roseberry and Irma at the usual hours. All are cordially invited.

The W. A. are holding an afternoon tea and sale of Home Cooking, also a sale of aprons at the home of Mrs. Pryce Jones on Saturday afternoon, September 7th.

The Ladies Aid will meet with Mrs. James Fenton on September 12th. Everyone welcome.

On Thursday, August 29th the regular meeting of the W. M. S. was held in the Church. Visitors were present from Wainwright and Vermilion.

This was also the 9th anniversary of the W. M. S. to honor the occasion supper was served to about 40 members and friends of the Society. This picture was to have been of a picnic nature. Unforeseen circumstances necessitated a change of plans.

A request is made to anyone interested who will contribute second hand clothing to fill a bale which is being sent to the Hobbema Mission Home.

The Society is also packing a barrel of fruit for Wabato mission school and would be glad of donations. Bring a full "Gem" and we will give you an empty one in return. Donations of clothing to be in by September 23rd, of fruit Oct. 15th. Leave with Mrs. Tripp or Mrs. Shaw.

The W. A. will meet at the home of Mrs. H. Carter on Tuesday, September 10th at 2:30 p.m.

An afternoon tea and sale of home cooking also a sale of aprons will be held at the home of Mrs. Pryce Jones on Saturday afternoon, September 7th.

The Ladies Aid of the United Church are putting on their Annual Bazaar on November 9th. Anyone wishing to help please see Mrs. Elford, Mrs. McLeod, Mrs. Tripp or Mrs. Ernie Simmons.

HOT SUPPER

There will be a Hot Supper and entertainment in the United Church on September 13th. Keep this date in mind. This is a district affair. Everyone come and meet their friends. Supper 50c; entertainment free.

GREAT ANGLICAN SERVICE

Anglicans of Calgary and district will hold a great service of praise and thanksgiving in the arena, Victoria park, Sunday evening, September 22, to mark the closing of the Synod conferences of the ecclesiastical province of Rupert's Land.

The World Famous Winnipeg Kiddies will pay a visit to Irma, and will present a program unequalled at Kiefer's Theatre, Irma, on Monday, September 16th. The Kiddies are on their Twelfth Annual Tour, and are now on their way home after a very successful tour of the Capital Circuit, and Alaska. They appear at Irma, with the permission of the Dept. of Education and Child Welfare Association. They carry their own school teacher, Wardrobe Mistress and Musical Director. A wonderful program of Songs, Dances, Musical Novelties, Acrobatics, Comedy and Harmony Singing. A Guaranteed attraction. The finest aggregation ever to appear in Irma. It's a real treat. Don't miss it!

Ford all metal tri-motor planes will be used almost exclusively on the route. Orders for seven of these huge ships have already been placed. One has been delivered and shipped to South America aboard the Winston Steamship "American Legion". This is the first Ford plane ever sent to South America.

DUCK SHOOTING OPENS

MONDAY, SEPTEMBER 16th

If you think there will be any ducks about, you are privileged to take the old shotgun in your hand on September 15th and any time thereafter until December 14. You can also take a crack at any geese you come in touch with providing they are of the wild variety. You can knock over Hungarian Partridges from Oct. 1st to November 15th.

Deer, moose, caribou may be hunted from Nov. 1st to Dec. 14th. If you meet a bear any time after August 31st you can run or shoot him. The government only protects bunnies from June 14th to August 31st.

Mr. F. Peterson returned Monday after spending a month in the southern part of the province, gathering specimens for the Publicity Department of the Provincial Government.

NEWS ITEMS FROM KINSALLA

Mr. and Mrs. Batchelor and family and Clark Steele of Fabyan spent Sunday with Mr. and Mrs. Anderson. Mr. Jack Stronach left on Saturday evening for Smoky Lake where he is teaching for another year.

Mrs. Scunty and daughter, of Edmonton who have been spending the past week with Mrs. Scott returned home on Monday evening.

Mr. B. Wächter, boss on one of the B and B ranges of the C.N.R. and son Claude spent the weekend and holiday at their home here.

Mrs. Frank Murray and infant daughter left on the Confederation last Wednesday night to visit her parents in Ontario she expects to be gone about a month.

Miss Isabel Stronach is going to teach near Minburn she left for her school on Monday.

Miss Edith Corbett left on Monday evening for her school. She will teach near Wetaskiwin.

Miss Marion Watson left on Saturday for Camrose where she will attend Normal.

Miss Fieries who is teaching near Loughheed spent the holiday at her home here.

School opened here today, Miss Larue in the High School and Miss Magrath in the public school.

Most of the farmers have finished cutting their grain and some have their threshing done.

The Women's Institute had a Sale and served tea on Saturday in Lee's Hall. Ice Cream was also served. They took in about \$27.00.

Mr. J. Ansell who is working on one of the Oil Drilling outfits near Wainwright spent Sunday at his home here.

NEWS ITEMS FROM JARROW

JARROW NEWS

The old dance given by the Community Club on Friday, August 30th was in every way a success. A large crowd attended and good music was supplied by the seven piece orchestra. Everything was so good that another dance is being held on Friday evening, September 13th and we hope everyone will come and make this old time dance as enjoyable as the previous one.

We are very sorry to hear of the serious illness of Mr. Harvey Dennison, in Lamont hospital, and Mrs. Lockhart who is very ill in Viking hospital.

Mrs. Bamsey has returned home after spending a week visiting in Edmonton.

Mr. and Mrs. Nichols and family are spending a few days in Edmonton after which they will visit for a while in Minburn before leaving for their new home in Sibbald where Mr. Nichols will be station agent. They will be greatly missed in our district but we wish them every success in their new home.

On Friday afternoon the Ladies Aid entertained at the home of Mrs. Orr at a farewell tea for Mrs. Nichols. The afternoon was pleasantly spent in music and singing and a most delicious lunch was served during the afternoon. Mrs. G. Matthews on behalf of the Aid presented Mrs. Nichols with some pieces of china and expressed regret at losing so valuable a member from our Aid. Mrs. Nichols replied in a few well chosen remarks thanking the Aid for the gift and more so for the good wishes.

The Ladies Aid met at the home of Mrs. James on Wednesday afternoon. A good crowd was in attendance and a most enjoyable meeting held. A tea and sale of work was planned for Saturday, Sept. 28th.

Mr. H. Tebo is in charge of the station here while Mr. Nichols is on vacation and until a new agent is appointed.

Miss Alberta Edmy of Edmonton, is visiting relatives in this district.

The Elks of Camrose are holding a Carnival from September 26th to October 2nd and the Elks of Vegreville are holding one on October 15th to 20th.

High School opened Monday with the usual attendance. Mr. Reeds is still in charge of the Irma Rural High School.

The Wastebasket

Something to worry about—a frog's eyelids wink upwards.

Have you noticed that chicken-hearted people are always trying to hatch up an excuse?

"You certainly have acute appendicitis," said a Wainwright doctor to a lady patient. "Oh, doctor, you flatter me," she replied.

"Help your wife," says an expert on domestic affairs. "When she mops up the floor, mop up the floor with her."

"Do you own your own home?" a young married man here was asked. "No," he replied, "my mother-in-law lives with us."

A careful observer says that as long as people lie about you, you are safe, but if they ever begin to tell the truth you are lost.

"Well, I'm going to get where my creditors won't bother me any more," remarked a young fellow on the street here yesterday. "Going to get out of debt?" asked a friend. "No, going out of town," he replied.

A pastor of a church in a neighboring town made the following announcement last Sunday: "Sister _____ is very ill at her home and Dr. _____ is attending her. Will all of the brothers and sisters pray for her?"

"I don't care much about George," said one flapper to another at the postoffice lobby, "half the time he wants to pet, and the other half he wants to discuss books." "I'm not interested in books, either," the other flapper responded.

"What do you mean by telling me that you forgot the hour when your class was called," asked a teacher of a high school student here. "Well, ever since I put grease on my hair everything slips my mind," he replied.

No wonder they say a man dies in the harness when he sticks to the job to the end. Life is just a harness. There are traces of care, lines of trouble, bits of good fortune and breaches of faith. Also tongues must be bridled, passions curbed, and everybody has to tug to pull through.

"Well, how do you like married life?" asked a lady at a social here of a recent bride. "Well, there is no difference," was the reply. "I used to wait up half the night for him to go home, and now I wait up half the night for him to come home."

A fellow who had bought a second-hand car at Bruce took it back to the dealer last week. "What's the matter with it?" asked the seller. "Well, you see," said the owner, "every blamed part of it makes a noise except the horn."

Here are the eight longest words in the English language. Try them on your friends. Philoprogenitiveness; Incomprehensibility; disproportionableness; substitutionableness; honorificabilitudinitat; velocipedistainstail; transubstantiationableness; preantitionsustantiations.

"Don't you think my cooking has improved since I got this new cookbook?" asked a young bride of her husband here last week. "Yes," he replied, "but occasionally I think I can taste a typographical error in the book."

A widow of a business man in a neighboring town ordered a tombstone for her husband and in discussing it with the agent of the company said she wanted just a plain stone. "But you want his name and epitaph inscribed on it?" the agent asked. "No," she replied, "you see my husband did not believe in advertising."

"Yes, he is a lot bigger than I am but I told him just what I thought of him for stealing my girl away from me," said a Holden fellow to another at the Grand Opening dance, "and I called him a sneak and a liar." "Didn't he try to hit you?" the other one asked. "No, sir, he didn't," was the reply, "I hung up the telephone receiver and walked away."

'PLAN' DISTRICT MUSICAL

FETE FOR EDMONTON

Edmonton will have a district musical festival in 1930, according to a decision reached at the last meeting of the committee of the Alberta musical festival association here. The question had been under consideration for some time past. It was felt that the district festival should in no way conflict with the provincial meet to be held at Calgary.

The High Cost of Sickness

Ten billion dollars a year, or one-ninth of the annual income of the United States, goes in that country to pay for illness or to repair damages inflicted by it, according to one responsible authority quoted in a recent issue of "The Literary Digest."

It is doubtful if in Canada the necessary information is available and data compiled to enable an estimate to be made of the costs of sickness to the Dominion as a whole. Probably in this more northerly climate and less congested centres of population, sickness is not quite so prevalent, although, on the other hand, owing to the distance which many of our rural population are from doctors, hospitals and nurses, the average cost per patient may be somewhat higher than across the line.

Some of the figures quoted by "The Literary Digest" as applicable to the United States may, therefore, be not so very far out in their relation to Canada. At all events, they are arresting and thought provoking. It is stated that the average individual between the cradle and the grave spends one-fourth of his time in bed because of incapacitating illness, and that for the same reason the average worker loses two per cent. of his time, or a fraction more than seven days a year.

The people of the United States, it is asserted, are paying for the treatment of disease not less than \$2,500,000,000 a year, or approximately \$100 per family. In addition there is an estimated annual loss of \$2,000,000,000 as a result of decreased wage-earning capacity. And there is a still further permanently interrupted wage-earning capacity through post-payable deaths, estimated to be \$6,000,000,000, making the total annual cost of disease to the people of the United States, \$10,500,000,000. The total annual income of the country is about \$90,000,000,000.

Can any people afford to pay such a staggering sum, constituting, as it does, such a large proportion of their total income on such a non-productive, destructive thing as disease and preventable deaths? The United States census returns make answer. According to this official compilation, 49.7 per cent. of patients in general hospitals, in 1923, were able to pay in full; 19.3 per cent. of patients paid in part, and 31 per cent. patients paid nothing. While no reliable data is available as to the extent that patients paid for the services of physicians, it is reasonable to suppose that physicians were paid at much the same ratio as the hospitals. If so, then only about one-half of the people paid in full for services required as a result of illness; 20 per cent. paid in part, while 30 per cent. paid nothing.

The conclusion reached is, that for the great mass of families with incomes below \$12,000 a year, there is only one of two alternatives when sickness overtakes them—medical charity or financial tragedy.

The further conclusion is reached that there are just two ways for lowering the cost of medical care. One way is by the provision of unnecessary disease, certainly the best and sanest way, and the other way is through the use of an organized medical service.

An organized medical service, it is pointed out, can be offered for financial returns considerably smaller than the cost would be if the patient obtained the same service from unrelated practitioners and specialists. An organized service makes possible economies which are not possible in an unorganized service. Certain examples are cited:

Through an organized medical service, some of the large universities are able to render a thoroughly modern medical service, including hospital care, to their students for from \$9 to \$12 per semester a year.

The Endicott-Johnson Corporation with its 16,000 employees and their families represent a population of approximately 60,000 people. The Corporation gives these employees and their families a medical service, which includes the full-time services of 27 physicians, 3 dentists, 1 X-ray technician, 51 nurses, and 2 pharmacists, for an annual cost of \$6 to \$7 per capita for the whole industrial population.

The industrial settlement of Rosok, Rapid, North Carolina, composed of workers of five cotton mills and one paper mill, gives a modern, efficient medical service, including hospital care, home visits, and public-health nursing, for \$23.60 per family, or at approximately \$9 per capita.

The insurance principle is urged as the remedy, and an effective one, for providing adequate medical care for a very large percentage of the people, and it is believed that insurance companies will, in time, embrace it as a part of their protective programme.

Add New Export To Canada's List

British and German Dealers Repeat Order For Fresh Salmon

A new product has been added to the exports of Canada to Britain and Germany in the shape of fresh Gaspé salmon. A few weeks ago a trial shipment of fresh salmon, frozen by a new brine solution leaving the fish as fresh as when it was taken out of its native waters, was sent to British and German fish dealers, who were so pleased with the result, that an order for 25 tons soon followed. Many more orders are expected.

Some of the wells drilled in rock salt deposits in China in order to pump up the brine are as deep as 3,000 feet.

It is estimated that there are 44,000 thunder storms occurring daily on the earth.

The art of pottery dates back as far as we can trace the human race.

Studies Alberta River

U.S. Engineer Warns On Problem To Prevent Mississippi Floods

With a view to obtaining information which might lead to the effecting of Mississippi floods, George Archibald of the Corps of Engineers of the U.S. War Department is investigating Canadian storage facilities in the hope that if the peaks of the floods of the Milk River in Alberta and its tributaries in Saskatchewan were smoothed off by the construction of reservoirs, the condition of the Mississippi area might be changed for the better. He intends to study intensely the conditions at the headwaters of the Milk River on the eastern slope of the Rockies near the Montana border. From its source here the Milk River flows north into Canada and then turns south again, its waters finally flowing into the Mississippi.

Due To Several Reasons

Never before has Saskatchewan been able to get through the work of the harvest season without help from the East. It will be possible this year for the first time because of the relatively small crop, use of labor saving machines such as combines, and the increase in western industrial population.

Messages By Heliograph

Heliographs have been successfully used for the regular transmission of messages between Prince Albert, Saskatchewan, and a station in the Prince Albert National Park over a distance of 30 miles.

Canada Wild Life

Shipped To Ireland

Sent By Express To Zoological Gardens At Dublin

Noah's Ark on a small scale passed through Montreal recently in the form of a shipment of Canadian wild life on the way from Toronto to the Zoological Gardens, at Dublin, Ireland. This special shipment was handled by the Canadian National Express, the crates being transferred from Bonaventure Station to the SS. Lord Antrim, which carried and headed the Irish Free State. The consignment consisted of two bears, one eagle, two woodchucks, two raccoons and four prairie dogs.

DO YOU VALUE HEALTH?

Sickness Almost Always Due To Weak, Watery Blood

If your health is poor, if you are pale, nervous and easily tired; if you suffer from headaches or backaches; if there are twinges or aches in your limbs; if you are often out of breath; if you may depend upon it that these symptoms come from an impoverished condition of the blood, and unless this condition is remedied a complete breakdown may follow. To any who are in this condition, Dr. Williams' Pink Pills will be found the perfect medicine. The whole mission of this medicine is to build up the blood, promote appetite and good digestion, and strengthen tired, frayed nerves. Men and women alike benefit through the use of this medicine. Therefore, if you are weak or ailing, give Dr. Williams' Pink Pills a fair trial and you will be pleased with the beneficial results that will speedily follow.

Among the thousands who have found Dr. Williams' Pink Pills a real blessing is Mrs. Geo. M. Andrews, Halifax, N.S., who says: "My first experience with Dr. Williams' Pink Pills was as an anemic young girl, when they completely restored my health. Then a few years ago I became pale and run down, and my husband got a supply of the pills for me. I gave them a good trial and when my baby was born she was a big healthy baby and I did not have a day's sickness. My friends all tell me how well I look and I certainly feel that way, and I give all the credit to Dr. Williams' Pink Pills. I hope my experience will help some other woman who needs a good medicine."

You can get the pills from your druggist, or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockton, Ont.

Honored Carrier Pigeon

Marble Plaque To Its Memory Unveiled At Verdun

The heroic City of Verdun saw the unveiling of perhaps the most novel war memorial in the world.

It is a marble plaque to the memory of the last carrier pigeon. No. 787-15, which on June 4, 1916, left the beleaguered fort of Vaux amid a storm of gas shells and machine gun fire.

It carried a message from Major Raymond, the commander of the fort, which read:

"We are still holding out, but we are meeting a very dangerous gas and smoke attack. It is urgent to relieve us. This is my last pigeon."

The pigeon got through, and was awarded the Legion of Honor and the Croix de Guerre. It was kept in the army pigeon headquarters as a pensioner until it died about four years ago.

Many infants are infected by worms which cause great suffering, and if not promptly dealt with may cause constitutional weaknesses difficult to remedy. Miller's Worm Expeller will clear the stomach and bowels of worms and will so act upon the system that there will be no recurrence of the trouble. And not only this, but they will repair the injuries to the organs that worms cause and restore them to soundness.

It is always hard to convince a pretty girl that love is blind.

Beauty may be merely skin deep, but it is nearly always effective.

WOMAN SO SICK COULD NOT WORK

Helped by Taking Lydia E. Pinkham's Vegetable Compound

Grainland, Sask.—"I am glad that I heard of that good Lydia E. Pinkham's medicine and I will not be without it again. I was so sick that I could not work at all and could not get on the machine. My aunt told me of Lydia E. Pinkham's Vegetable Compound and now I am telling all of my friends how good it is and I will answer all letters I get from women."

Mrs. MARY SCHULTZ, Grainland, Sask.

SHIP YOUR GRAIN

— TO —

McBean Bros.

Crop conditions the world over appear to be unfavorable this year. As a result, we consider higher prices warranted than those prevailing. It is our opinion, given after careful study of the world's conditions, that our wheat should worth today \$2.25 a bushel, and with considerably higher prices later on.

Re shipping your grain to us you can obtain the highest market price, and then hold for a favorable market.

Winnipeg, August 15, 1924.

New British Liner

"Britannic" Of White Star Line Is Largest British Motorship

The twin-screw motor passenger liner "Britannic," built by Messrs. Harland & Wolff, Limited, for the White Star Line, has been successfully launched from the builder's North Yard, Belfast.

The "Britannic" is intended for the Liverpool-New York service of her owners, the White Star Line, and will be a notable addition to the White Star fleet, being the largest British motorship.

The accommodation provided for the 1,550 passengers (cabin, tourist, and third class), will set up a new standard on this route, noteworthy features being the swimming pool and tennis courts in the cabin class, and children's playrooms and elevators in the tourist and third class accommodations. The size of the "Britannic" has given ample opportunity for spacious planning, and effortless design in the cabin class public rooms; and the impression of restricted space so common on board ships has been very effectively eliminated.

The cooling throughout the ship is carried out electrically, and this not only includes the main ranges, but also supplementary appliances—grills, roasters, fish fryers, salamanders, griddle plates and hot presses. In this connection the baker's oven, together with the oven in the confectioner's shop, is also electrically operated.

It was the most popular ship sailing out of the port of New York during the tourist season. Never before has the tourist of moderate means been so catered for by a steamship company, and the ease of shipping means that the White Star Line are to be congratulated on the effort they have made by means of the "Britannic" to cater to the tourist who cannot afford the money demanded for the first class ships, and it is felt that a cabin class ship, such as the "Britannic" will fill a very necessary place in the shipping life of New York.

A Prime Dressing For Wounds.—In some factories and workshops carbolic acid is kept for use in cauterizing wounds and cuts sustained by the workmen. Far better to keep on hand a bottle of Dr. Thomas' Electric Oil. It is just as quick in action and does not scar the skin or burn the flesh.

No Cause For Alarm

Oil Drillers Could Penetrate Earth Thirty Miles Without Danger

Some of the oil wells in Alberta are understood to have been drilled a mile down into the earth's surface. Uneasiness has been felt that perhaps this drilling is going a bit too deep. But there's no danger.

A Harvard professor has told the Seismological society that the core of the earth is a sea of dense liquid gas on which oceans and continents float and slide. This core is surrounded by successive shells.

If the Alberta oil drillers have pierced a shell or two, they're still a long way from tapping the liquid gas, that, presumably, if allowed to escape, would poison the continent.

To get down to it they will have to drill thirty miles.

Choked For Air. Some little irritant becomes lodged in the bronchial tubes, others gather, and the awful choking of asthma results. Nothing offers quite so quick and positive relief as Dr. J. D. Kellogg's Asthma Remedy. The healing, soothing smoke or vapor penetrates, clears the passages and gives untold relief. It has been tried years of success. It is the sure remedy for every sufferer.

Must Have Been Heavenly Wife (on honeymoon): "Do you remember our first meeting?" Hubby (a dentist): "Shall I ever forget it? That heavenly afternoon when we were together for two hours and I extracted three of your darling little teeth."

Keep Minard's Liniment always handy.

Seeing Persia From Air

Takes Eight Hours Compared To Forty Days By Camel

Seeing the Euphrates from the air is one of the inducements being offered by the new air service that connects Bagdad and Gaza. The management claims that in no other way can the beauties of the river and of Persia be fully appreciated. The view of the serpentine river at the time the "hind of the morning" struggles to break through, is unusual. As the sun finally bursts forth in all its glory, the stream takes on more and more the appearance of a snake, twisting and writhing, its skin dazzling metal. A splendid view of the Dead Sea is also obtainable. The trip by air takes eight hours, compared with 40 days of travel by camel.

Services Not Accepted

Rain-Maker Offered Showers To Saskatchewan For Ten Thousand Dollars

Promises of a rain-maker to extract from Saskatchewan's cloudless skies any required amount of rain, met with a sceptical reception by Regina council.

A quaintly worded letter from T. Y. Wojnowski, Lasalle, Ill., carried the offer. It was addressed to the office of the city of Regina, Saskatchewan, Canada, and came by registered mail. The communication read: "Honorable Sir: At present I offer you nine services to make the rain. Mine salary will be \$10,000, and rain how much you wish? Respectfully, T. Y. Wojnowski."

The letter will be filed among the city records.

Had Diarrhoea

Bowels So Active Fearing For His Life

Mrs. S. J. Jago, Canobie, N.B., writes: "My little boy, when three years old, had a severe attack of diarrhoea. The bowels were so active, and he vomited so much, I feared for his life. I tried many medicines, but he was always getting worse. A friend told me of

and after the second dose I saw an improvement. I gave him almost half a bottle and he was completely relieved. I have used it for the other children, and my husband and myself. My husband gives it great praise, and when he goes away from home to work he always takes a bottle with him."

Put up only by The T. Milburn Co., Ltd., Toronto, Ont.

and when he goes away from home to work he always takes a bottle with him."

Through its FACULTY OF ARTS AND SCIENCE courses leading to the degrees of B.A. and M.A., and B.Sc., including B.Sc. (Phy.), and M.Sc. Through its FACULTY OF ENGINEERING, AND ARCHITECTURE courses leading to the degrees of B.Sc. (E.), B.Sc. (E.L.), M.Sc., and Ph.D. Through its FACULTY OF MEDICINE courses leading to the degrees of M.D. and C.M. Through its FACULTY OF AGRICULTURE AND HOME ECONOMICS courses leading to the degrees of B.S.A. and B.Sc. (H.E.C.). Through its MANITOBA LAW SCHOOL, an affiliated institution, a course leading to the degree of LL.B. For terms of admission, details of courses and other information, apply to J. SPENCE, Registrar, University of Manitoba, Winnipeg.

Noted Inventor Dead

Sir Ernest De La Rue Found New Way To Make Paper Mache Splints

Sir Ernest De La Rue, remembered largely for his invention of a new way of making paper mache surgical splints and boots in the world war, is dead at the age of 77 years. His method was adopted by the majority of the war hospital depots and he organized and financed a Dillingham branch, which turned out many thousands of splints and boots.

Sir Ernest also was noted as the inventor of the electric starting gate used by the Jockey Club, and as a designer and constructor of the whole of the decoration of the great Albert Hall, one of London's most famous gathering places.

Protect the child from the ravages of worms by using Mother Graves' Worm Expeller. It is a standard remedy, and years of use have enhanced its reputation.

Canada's National Parks

Province Of Alberta Has Seven Areas

Totaling 8,662 Square Miles

Out of the 11,574 square miles devoted to national parks throughout Canada, the Province of Alberta has 8,662 square miles. There are seven park areas in the province, the largest being Jasper National Park, with an area of 5,330 square miles; Rocky Mountain Park is next in size with 2,751 square miles; Buffalo Park has 197.05 square miles; Elk Island, 54 square miles; Neetsikan, 8.05 square miles, and Waterton, 229 square miles.

Minard's Liniment For Summer Colds

American tourists this season will spend \$300,000,000 in Canada, according to a Canadian bank forecast.

It is estimated that more than 1,000,000 stars have already been seen through powerful telescopes.

Historic Sites Board Have Marked For Perpetuation Another Group of Historic Places

The Historic Sites and Monuments Board of Canada met at Ottawa recently and marked down for perpetuation another group of historic sites.

One hundred and twenty-nine such sites have been marked with a permanent monument since the board commenced its labors in 1919. These marks stretch from the international border to the Arctic, from the Atlantic to the Pacific. There is a wooden pillar to mark the site where Sir Benjamin Franklin last camped; there are monuments large and small from monoliths to cairns, from pillars to tablets.

Only last year a monument was unveiled to mark the landing of Jacques Cartier at Ile aux Coudres on September 6, 1635. At this place was held the first Christian service in the land of Canada.

At the recent meeting of the board 125 other sites were reviewed and several recommendations were made for immediate markings. Among these the outstanding ones are:

Wolfe's Landing, Capbreton Bay, Cape Breton, where Wolfe's brigade landed on June 8, 1758.

First coal mine in Cape Breton—the site of the first regular coal mining operations in America, begun by the French in 1720.

Fort St. Anne, Cape Breton: site of an early settlement and Jesuit Mission established by the French in 1625.

Fort St. Peter, N.S.: site of a fortified post and trading station built by the French in 1650.

Minto coal mines, N.B.: to commemorate the discovery of coal by the French near the present town of Minto, soon after their occupation of Acadia.

Chamby Road, P.Q.: the first road built in New France in 1660.

King Mountain, P.Q.: site of the first triangulation station of the geodetic survey of Canada, established in 1905 about nine miles north of the City of Ottawa.

Quebec Seminary, Quebec: site of the first educational house in Canada, established by Laval in 1663.

The Normandale Furnace, Normandale, Ont.: founded in 1818 and operated until 1853.

Kingston, Ont.: commemorating the treaty signed with the Mississauga Indians, 1793, whereby a large tract of land in eastern Ontario was purchased for the settlement of United Empire Loyalists.

Fort Erie, Ont.: commemorating the enterprise and courage of the men of the Royal Navy and the Royal Marines in capturing the United States ships of war, Ohio and Somers, in the Niagara River, Aug. 12, 1814.

Bay of Quinte Carrying Place: commemorating the treaty concluded with the chief of the Mississauga Indians in 1787, by which a large tract of land in western Ontario was ceded to the Crown.

Quennell, B.C.: to commemorate the beginning in 1885 of the work on the Collins overland telegraph line, intended to link America and Europe by way of British Columbia, Alaska, Behring Straits and Siberia.

Fort Prince of Wales, Churchill, Man.: the most northerly fortress on the American continent, built by the Hudson's Bay Company in the years from 1733 to 1747 to safeguard the harbor.

Observed Minute's Silence
Tolling bells, sirens, and salvos of artillery fire reminded Belgians on August 4, of the fiftieth anniversary of the invasion of Belgium by the German Imperial armies, after they had been refused permission to pass through the country to combat the French. The population observed a minute's silence, throughout the country.

W. N. U. 1800

VISITING CANADA

Dr. Victoria Chung, graduate in medicine of the University of Toronto, who arrived from China to spend her holidays in Canada.

SUBTLE CHIC

A claret-red canton crepe for theatre, dining and bridge that expresses Paris chic in modified Princess silhouette. The long waisted bodice with pointed yoke front and back is beautifully molded to create soft slender effect through hips. The attached flaring circular skirt dips smartly at sides and back. The pointed treatment at centre-front is interesting detail. Style No. 597 that comes in sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust, is made with 4 yards of 39-inch material in the medium size. It is captivating in black chiffon for dinner wear, made with or without sleeves. White chiffon is very smart and flattering to svelte skins. Flowered chiffon, figured chiffon, cotton voile, georgette crepe, crepe Elizabeth, crepe de chine and crepe satin also appropriate. Pattern price 25 cents in stamps or coin (coin is preferred).—Wrap coin carefully.

How To Order Patterns

"I can't understand it, madam. The last dozen I sold you were the very best Empire eggs."

"Yes, but are you sure it wasn't the Roman Empire?"

"Tommy, can you tell me one of the uses of cowhide?"

"Er yeasir. It keeps the cow together."

Pluck begets more happiness than luck.

Horticulture On the Prairie

Experimental Station At Morden Shows What Can Be Done

A visit to the Morden, Manitoba, Experimental Station at this season of the year and indeed until the autumn frosts arrive, affords a rare treat to those who are interested particularly in fruit and vegetable crops. Apples, plums, cherries, grapes, strawberries and cane and bush fruits are grown in large quantities and in many varieties. Visitors will learn much to their advantage with respect to varieties worth trying at their own homes and will see the effect of a shelter belt in growing garden crops. The flower borders and beds present a blaze of colour and afford many useful lessons in varieties of the gladiolus and many other flowers and the best methods of their cultivation. The report of the Morden Station, published by the Department of Agriculture, Ottawa, if reviewed in advance of a visit would greatly help the visitor to appreciate the things he would see and to systematize the study that his visit would afford.

Has Necessary Qualities

Human Hair Used In Mechanism For Sounding Foghorns At Sea

A single human hair will support a weight of almost three to five ounces. It is thus almost as strong as a steel wire of the same diameter. Unlike steel wire, however, human hair is exceedingly elastic. It is also very susceptible to changes of climate and temperature.

This combination of qualities has led to its employment in the mechanism for sounding foghorns on boats at sea. Some scores of human hairs are fixed side by side, like the hairs of a violin bow. These stretch in foggy weather; so opening a valve which releases enough compressed air to work the siren and repeats at regular intervals so long as the fog lasts.

Employees Following In Father's Footsteps

Second and Third Generation Working For Canadian National Railways

The transfer of the motive power shops of the Canadian National Railways from the old to the new building at Point St. Charles, Montreal, has revealed that out of some 1,422 employees on the register of the old building, 167 were of the second generation, 18 of the third generation, and two of the fourth generation of present or former workers in the same place.

Building a city is certainly as important as building a home. Why, therefore, should there not be as much care shown in planning a community as in planning a residence?

The King Of Fruits

People Should Give More Attention To Canadian Apples

Enthusiasts give this name to the apple, and there is need for more of these people in the Dominion. In the order of their ripening the varieties line up as follows: Red Astrachan, Transparent, Chenango and Duchess, followed in order by Alexander, Wolf River, Gravenstein, Wealthy, Colvert, St. Lawrence, Maidens Blush, Blenheim, Ribston, Hubbardston, Fameuse and McIntosh Red, the latter two being dessert apples. Many of these fall varieties will keep in a cool place until well into the winter.

The winter apples as they appear on the market are in the following order: King, Rhode Island Greenings and Wagener, but these are closely followed by other excellent winter varieties such as the Baldwin, Seek, Pewaukee, Ontario, Jonathan, Yellow Newtown, Spy, Golden Russet, Ben Davis, Stark, Fallawater, Roxbury Russet, Spitzenburg and Rome Beauty.

Information on the culture of the apple with hundreds of recipes covering practical uses for the apples will be found in a bulletin entitled "Canadian Grown Apples," which you may have on application to the Publications Branch, Department of Agriculture, Ottawa.

Bought Lower Grade Wheat

European Importers Took Large Quantity At Attractive Price

During the 12 months ended July 27, 1929, world shipments of wheat and flour amounted to 917,297,000 bushels as compared with 792,808,000 bushels for the previous corresponding period.

In that year of lower prices Europe became a more prominent figure in World Trade. It absorbed about 220,000,000 bushels which was approximately 90,000,000 bushels greater than the year before. Considerable quantities of this was low grade wheat which, however, was of good milling and baking quality and was readily taken by ex-European importers at the attractively low prices.

Somebody Has To Pay

"Farm products cost more than they used to," said a city visitor. "Yes," replied the farmer, "When the farmer is supposed to know the botanical name of what he's raising, an entomological name of the insect that eats it, an pharmaceutical name of the chemical that will kill it, somebody's got to pay."

Berlin, Germany, claims to have the oldest continuously operated automobile factory in the world.

It takes a mighty little shove to send some men downhill.

'They're Off!'

Over 2,000 employees of the Canadian Pacific Angus Shops with wives and families took their August Bank Holiday picnic at St. Jerome, near Montreal, early in August. The famous fair at Hampstead Heath, London, held every year, was reproduced in the gathering which is the great event of the year for the Shops. Here is shown the start of the Married Women's Race with an entry of thirteen contestants. Every conceivable game was represented from the sliding ladder to a typically English old-fashioned "cokernut" shy. Prizes ranged from tennis rackets to watches and including many serviceable articles of wearing apparel. Eighteen races were run off.

Four Research Projects Are Under Way With Object Of Improving Wool and Mutton

Movie Stars on C.P.R.

Vilma Banky, favorite star of the movies, travelled Canadian Pacific to Montreal recently from Boston to appear at a local theatre that was showing her latest release "This Is Heaven." Rod La Roque, her husband, took advantage of her visit to join her in Montreal, also coming by C.P.R. The day previous to her arrival, Victor McLaglen, hero of "Whispering Willows," travelled by C.P.R. to Montreal. Thousands of movie fans welcomed the stars at the Windsor Street Station, Montreal, on their arrival.

Crop Almost Certain On Summer fallow Land

This Cannot Be Said Of Spring Or Fall Ploughing

This year of extreme drought has illustrated clearly the fact that summer fallow land is almost certain to produce a crop, while spring ploughing, and even fall ploughing, are not. Throughout the prairies, where damage from lack of moisture varies from district to district, it has become plain that those farmers whose acreage is sown mainly on spring ploughing, will finish the season relatively in poorer condition. And it is noticeable in what cases there are of crops being ploughed or pastured, that it is the spring ploughing, or occasionally fall ploughing that is abandoned before summerfallow.

Summerfallow acreage, while it shows some decrease over 1928, is still a substantial part of this year's sowing and new breaking is larger in Alberta and Manitoba. The following table gives the estimated acreages this season under summerfallow, new breaking and fall ploughing in the three provinces.

	New Fall	Summer-Break Ploughing
Manitoba	1,519,000	76,000
Saskatchewan	5,879,917	524,637
Alberta	2,732,600	850,000

While a certain amount of abandonment of sown fields is taking place this season, there are some benefits which will tend to follow. Land ploughed up at this stage of the growing season will have almost as good a rest as genuine summerfallow, and should be more fertile next year. And farmers are also taking the opportunity of killing weeds by consistent ploughing of land where the natural strength of a crop does not preclude them. On the whole next spring there should be more land in good condition than for several years, especially in those areas badly affected by drought at the present time.

The Retort Courteous

A famous scientist was presented at a dinner, at which one of the guests began to deride philosophy. He went on rudely to express the opinion that the world "philosopher" was but another way of spelling "fool." "What is your opinion, professor?" he asked, smiling. "Is there much distance between them?" The professor surveyed his boorish vis-à-vis keenly for a moment, then, with a polite bow, responded, "Sometimes only the width of a table."

It is perfectly all right for a woman to want to hold on to her youth, but she should not do it while he is driving.

To improve both Canadian mutton and wool by establishing the required type of sheep, four research projects involving the Federal Department of Agriculture, the University of Saskatchewan, the University of Alberta, and the New Wool Research Laboratory being set up by the National Research Council at Ottawa, were authorized by the growers' section of the council's associate committee on wool at Ottawa.

In the belief that definite improvements can be made over the present Canadian range varieties and valuable leadership given to ranchers by providing a basis for accurate advice to that end, Prof. J. P. Sackville, University of Alberta; Prof. A. M. Shaw, University of Saskatchewan, and W. H. Fairchild, Dominion Experimental Station, Lethbridge, forming a sub-committee, made the proposals that were adopted by the session.

Specially selected fine-wool range ewes, numbering probably 200, to be used as the foundation of a carefully planned experiment in grading and cross-breeding, will be gathered at Saskatoon by the University of Saskatchewan. Stud rams of several long wool breeds may be imported from England or elsewhere. The now better known methods of genetics that will be applied in experimenting with them are expected to show results in a short time.

At the Lethbridge Experimental Station, tests of the Corriedale sheep so well established in New Zealand, will be continued. Hardiness and adaptability to range conditions are to be determined.

General environment conditions including, where feasible, such factors as temperatures, humidity, rainfall, age of sheep and feeds available will be studied by the University of Alberta, at Edmonton, and data along similar lines will be sought from the sheep growing areas of Saskatchewan and British Columbia as well. These conditions, it was noted, had considerable influence on the character and amount of wool produced.

For the fourth project co-operative work is to be undertaken with one or more ranchmen between 500 and 1,000 ewes of uniform type, being bred to Corriedale rams. Information as to the wool produced will be studied in the wool laboratory that is being established in temporary quarters here pending erection of the new national laboratories building. Results of British research in wool are being made available to the council's officials.

Announcement was made at the meeting that the full wool committee would hold its next meeting in Toronto, on November 18, the day before the opening of the Royal Winter Fair.

Those present, in addition to the sub-committee were: Dr. H. M. Tory, chairman; Dr. J. H. Grisdale, Deputy Minister of Agriculture; A. A. MacMillan, Dominion Livestock Branch; G. B. Rothwell, Dominion Animal Husbandry; Prof. R. G. Knox, Ontario Agricultural College, Guelph; W. H. J. Tisdale, assistant manager, Canadian Co-operative Wool Growers, Toronto, and E. E. Lathé, secretary.

Mining Of Soda

A large plant is being installed at Last Chance Lake, near Beaver Dam and about 20 miles north of Clifton, B.C., for the mining of soda from the bottom of the lake. The mine will be operated by the British Columbia Chemical Company, Ltd., and it is expected to be operating within 90 days, with a shipping production of three carloads of soda per day.

About the only steps remaining that pedestrians may take to protect their rights are fast ones.

"Pardon me, but we have certainly met before."

"Heavens! How much do I owe you?" — Sonagliasse-Strix, Stockholm.

Opening of Elks Community Hall Was a Joyful Occasion

Elks and Community Hall Company Hold Grand Opening of New Auditorium Which Was a Brilliant Affair.

(From the Viking News)
Large Crowd.
Large crowds were in attendance both nights at the opening of the new Elks Community hall on Wednesday and Thursday of last week. The first night was devoted to opening addresses, carnival, midway features and dancing from 8.30 to 12.30.

Opening Ceremonies.
The opening ceremonies consisted of short speeches by Rev. A. L. Bee, Mr. W. H. Heller, district deputy grand exalted ruler, Edmonton, and H. G. Thumell, mayor. J. L. Clinch as chairman got the ceremonies off to a good start. The mayor on behalf of the town, extended a welcome to the merry crowd, and recounted the important steps in the progress of the community. He spoke of the spirit of co-operation that existed which has built up many local enterprises, including the new hall.

Rev. Mr. Bee complimented the community upon the erection of such a splendid edifice and congratulated the building committee and contractor for the splendid results obtained. Much hard work had been done by all connected with it, and he hoped that the hall would always be a source of happiness and education to the people of the community at large.

Mr. W. H. Heller, of Edmonton, was the next speaker, and in an eloquent address spoke of the work of the Elks in the province and what they were doing to help build up communities and make life sweeter and happier for all. At the close of his address he presented the keys of the building to G. T. Armstrong, secretary of the Elks lodge for safe keeping, in a burst of applause from the audience. From then on the games of skill and dancing were resumed with vim and vigor until midnight when lunch was served in the hall after which everyone departed for home.

Brilliant Affair.
The second evening the hall was the scene of a grand opening ball which was a brilliant affair. The beautifully gowned ladies from this and neighboring towns made a lovely picture as they danced gracefully about with their partners to the music of the Jolly Sparks orchestra.

Many Visitors Present.
Visitors were present from Edmonton, Wainwright, Killam, Strone, Holden, Vegreville, Selkirk, Toole, Irma, Jarro, Innisfree, Bruce and other centres, all of whom were delighted with the hall. Lunch was served at midnight, when it was announced that A. J. Horton held the lucky ticket who was called to the stage and presented with the handsome leather club bag while the crowd cheered as Art bowed as gracefully as a prima donna. The end of the evening seemed to come all too soon, but

the crowd joined heartily in singing the national anthem at 2.30 A. M.

Elks Saw Need of Hall.
The hall is the result of much planning and preliminary effort on the part of the members of the Viking Elks Lodge, who when organized three years ago realized the need of a hall and auditorium for this growing and thriving business and social center. It was also realized from the beginning that it should be a real community affair, and an organization was perfected known as the Viking Elks Community Hall Company Limited. A year ago a campaign was begun by the Elks to sell shares in a community hall and there was a generous response both from members of the lodge as well as non-members. The services of an architect were secured who presented plans and specifications to the building committee. Orders were called for but were found too high, and it was decided to not proceed any further to the time being.

Campaign Successful.
This spring the campaign was renewed and new plans were called for. Mr. J. J. Leeder, local contractor, submitted satisfactory tenders which were accepted and work was commenced on May 25th and in three months the hall was completed as it stands today on Main street north, a credit to the community and a monument to those whose foresight and unswerving loyalty and attention to detail and duty made it possible, coupled with those whose faith in the enterprise was backed up by liberal subscriptions for shares in the company. The members of the building committee who were the guiding spirits during the construction of the hall were Messrs. J. J. Skaltzky, W. L. Campbell, Dr. Little, N. C. Graham and Nels Hefso. They acknowledge with thanks much volunteer and unselfish assistance from many men and members of the committee. The electric wiring was done by Bud Lewis of Wainwright, who is recognized as an expert in his line. The fixtures and lighting effects are a source of satisfaction and enjoyment. The electric energy is being supplied by Messrs. McAthey & Jones, and the splendid bright light was a credit to the local plant.

Large and Commodious.
The outside dimensions of the hall are 38x60 feet; hardwood dancing floor 37x58; seating capacity 500. Three hundred opera chairs of the latest type have been ordered and will soon be in place. There are two cloak rooms, stage, kitchen, two dressing rooms, two regular rooms, restrooms, storage room for chairs, and an up-to-date projection room suitable for silent or talking moving pictures. A large canvas is supplied to cover the

floor at all times except for dances. Leased by Elks.

The hall has been leased to the Elks lodge who have sub-leased it for two nights a week to Messrs. Metcalf & Collins, of the Viking movies, who hold their opening nights Friday and Saturday, September 13th-14th. It is the intention of the hall company, to improve the grounds, and when finances are sufficient, to have a bowling green laid out on the south side of the building.

Credit to Community.
That the hall will justify the hopes and aims of those who have erected it and be a source of usefulness, pleasure and entertainment for the community at large, is the consensus of opinion of all who attended the grand opening, and now that there is such a fine building here, let us all assist in keeping it as clean and pleasant in every way as it was at the opening.

At the meeting of the council on Monday evening W. H. Sheets was appointed constable and night watchman. Ratepayers and business men will no doubt endorse this move on the part of the council as it is being done to prevent if possible breaking into stores, residences and violence of any kind. The curfew by-law is also going to be enforced to the letter, and in this, and in the prevention of fires and crime, citizens in general are asked to cooperate with the constable as much as possible.

A lot of people in this community possibly don't know that there was a real circus held in town this summer not so long ago. There was a merry-go-round, bingo, trapeze performance, high diver, troupe of midgits, spear throwers, musical show, and a number of other high class attractions. The midway was erected on the vacant lot opposite the Reliance lumber yard and did a good business for two whole days and nights. Yes, it was staged by the kids in the neighborhood. The proceeds were used for a weimer roast last Friday evening and the troupe, with the neighbors invited, were given the treat of their lives, with enough "hot dogs" to go around several times. Mr. and Mrs. Carwright and Mrs. Runyon cooked the weiners and served the coffee.

Mr. and Mrs. Lee Harvey who have been visiting the latter's brothers, Steve, Percy and Evan for the past two months, left today for their home in Long Beach, California. On their return trip they will stop at Banff, Lake Louise, Calgary, Vancouver, Seattle, Portland, Bendleton and finally the Sacramento, California State Fair. Their trip to Canada included stops at Reno, Salt Lake City, Yellowstone National Park, Great Falls and Glacier National Park. Lee said, "It has been a real pleasure renewing acquaintances and I would not mind living in good old Viking again, but we are established in California now and my business is good so must return."

Mr. and Mrs. A. G. Andrews, of Sedgewick, attended the opening of the community hall here last Thursday evening. While here they were the guests of Mr. and Mrs. Purvis.

Harold Green left on Monday for Calgary where he is attending high school.

VIKING

A convention of agents of Imperial Oil Limited, covering the territory from Edmonton to Chauvin was held at the King Edward hotel, Viking on August 28th when important matters pertaining to the policy of the company were discussed. Officials of the company present were: A. Turley, manager of the Edmonton division; A. J. Avison, assistant manager and S. T. McCabe, chief accountant.

Agents from the various towns were particularly optimistic regarding the business of the company.

A very pretty wedding took place at St. Mary's church on Wednesday, August 28th, when Mr. J. Noel, of Bruce district, and Miss M. Kowalski, of Torlea district, were united in marriage by Rev. Fr. O'Neill, at St. Mary's church, Viking.

A wedding dance was held in the Torlea school on Thursday evening when hundreds of neighbors and friends gathered to join in the festivities and wish the newlyweds success and extend congratulations.

Both young people are well and favorably known in the community. They will reside on a farm west of town.

Among those from Wainwright at the opening of the new hall were Mr. and Mrs. Paul Graham, Mr. and Mrs. A. C. Wittmann, and Mr. and Mrs. J. L. Horton, all of whom were high in their praise of the building as an addition to the town.

F. E. Nichol and party were up from Killam on Monday and while here took occasion to inspect the new Elks hall and expressed their views that it was one of the finest in the province.

H. Oelback delivered the first load of the 1929 crop, Garnet wheat, to the local Pool elevator on Thursday. It was trucked in by Chas. Maxwell.

Mrs. P. E. Finch and little daughter Aileen, also Miss R. Vivas, R. N. returned on Confederation on Wednesday after spending the past two months in Victoria and Vancouver.

John Pratt, son of town brought in the first load of wheat to the Security elevator last Wednesday. It was threshed by Slavik Bros. and graded No. 2, and was sold at \$1.30 per bushel.

Miss Jean Campbell who has been a guest of Dorothy Jones for the past week returned to her home on Sunday evening.

Miss Dorothy Symes left Saturday for Edgerton to teach in the rural schools in that district. Miss Ena Symes will attend high school at Irma.

Mrs. J. L. Dodds is a visitor in Edmonton for a few days this week.

Mr. and Mrs. T. H. Metcalf motored to Edmonton the first of the week to Mr. and Mrs. Newberry, of Edmonton, were in attendance at the grand hall here Thursday evening.

Mr. Caroe and Buzzy Jones spent the week end and labor day visiting with the latter's parents.

Miss Slavik who is employed in Nichols store at Killam is home for a few days.

Born to Dr. and Mrs. G. M. Little, at the municipal hospital, on Thursday, August 29th, a son.

Miss Helen C. Stimpson arrived on Monday from Edmonton. She will teach at the Iron Creek School this term.

Mike Johnson, the building contractor, came down from Telford Saturday and is doing some work in this district.

Mrs. Gillespie and children and Miss Violet Loades returned from a holiday spent at Cooking Lake last Saturday.

When performing an operation for the tonsils on Cecil Paulson, of Alliance, at St. Joseph's hospital, Galahad on Saturday last, Dr. Cook found that Cecil was the possessor of three tonsils. This is at least unusual as only one person in 5,000 is found with three tonsils.—Forestburg Herald.

The work of removing the electric light poles from Main street and erecting them in the alleys is progressing this week. Evan Jones is doing the work without any inconvenience to the electric light users. Messrs. McAthey & Jones are making extensions and alterations to their lighting plant and equipment which will make it one of the best local light plants in the province.

Burglars broke into a store at Lavoie last Wednesday and made away with over three hundred dollars worth of goods. When they got through with that job they held up a man in a car on the street and relieved him of \$200 cash, then left him bound and gagged in the alley. They escaped.

A party of tourists in two trucks stopped at the McAthey & Jones garage Monday evening and filled up with oil and gas. They had come from Pennsylvania in fifteen days and were on their way to the Camrose district to take up farming. One of them stated that they were returning to Alberta after four years in Pennsylvania, and were tickled to be back in Canada again.

Happy School Days Here Again

So many things for parents to think of now when the girls and boys are back to school.

It is really surprising how the kiddies go through their shoes and clothes during the holidays and a lot of new ones are needed at this time of the year.

Wet weather has to be thought of, the snowy days that must come, oh, in such a short time. Perhaps the little boy or girl are just starting out in the great adventure of school.

Follow closely the offerings of the merchants in this paper, and you will find that money and time can be saved by buying school outfits and school supplies locally.

Let the Weekly Message of Local Merchants Be Your Shopping Guide for All Your Needs.

Expecting the Best

Farmers dealing with United Grain Growers expect the best in service and treatment.

They have a right to expect it, for this is a farmers' company and it has the experience, the resources, the organization and equipment to give such service and treatment.

Deliver your Grain to —

UNITED GRAIN GROWERS LTD.
ELEVATORS AT VIKING, KINSELLA, IRMA, JARROW.

C.P.R. Champion Sheep

Canadian Pacific flock of Suffolk sheep at Tilley, Alta.—there are 300 of them—have been sweeping the board in western stock exhibitions lately. Against strong competition at the Saskatoon Exhibition they won every first prize and every championship. Also shown in above is the C.P.R. champion Hampshire ram which took first prize in every show in which it was entered. Prize sheep and cattle on the C.P.R. experimental farms in the West are doing a great work in improving stock in the Prairie Provinces.

CULTIVATION OF PERENNIALS IS GROWING IN POPULARITY

Generally speaking the plants can best be divided or planted in the spring as early as possible after the frost is out of the ground. There is, however, one exception, the peony, which should always be planted in the early fall, so that it may get its feeder roots well started for the early production of foliage and blooms in the spring.

The peony is possibly one of the best of the hardy perennials and as there are a great number of varieties which bloom at different times it is possible to have, by planting several selected varieties, continual blooms for many weeks in the spring.

Iceland Poppy Hardy
Possibly the earliest of the perennials is the Iceland poppy, which grows almost like a weed. Very early in the spring the delicate yellow and red colors of this flower make a beautiful splash of color before anything else is blooming. They bloom continuously through the summer until frost comes and seed themselves profusely.

The Iris is another beautiful perennial and comes in so many varieties of coloring and times of blooming that there can be blooms for several weeks during the early spring. The sword-like foliage is always a decoration to the bed even after the blooms are gone.

Aquilegia is another beautiful plant which adds to the beauty of the border with its delicate colorings and beautiful foliage and is quite hardy here.

Lilies are proven hardy in many varieties, and make another very beautiful addition to the garden. The prairie lily, tiger lily, Siberian coral lily, elegans, red lily are all hardy here. There are some dozen or so varieties which grow well in this climate.

Flower Grows Popular
The viola, the beautiful pansy-like flower with its wonderful rich colors in so many varieties, is becoming more and more grown here.

The delphinium, in its varied blues and mauves, is a magnificent background for the flower bed, or, if planted in clumps in front of the shrubbery makes beautiful coloring during most of the summer. If a circle of chicken wire is supported by a stake or two and placed around the plants when small it will support the spikes and keep the plants together when the winds come, and add to the symmetry of the clump and the wire will not show as the leaves and spikes grow through the mesh.

One may almost call the rose a hardy perennial, as there are many which will come through with a little protection from the early thaws and well repay one the attention given them.

Scarlet lichens is another brilliant plant which will do well in this climate and comes in two or three colors. It gives beauty to clumps of shrubbery and is well worth growing.

Sights We Have Never Seen

A fish as big as the one which got away.

A ratepayer begging to have his assessment raised.

A car that came off best in a collision with a freight train.

A back seat driver admitting she was wrong.

An autoist agreeing with the cop that he was exceeding the limit.

An election candidate promising to raise taxes.

A radio fan in a rage because he got Havana instead of Calgary.

Too much money!

When you pull down the town in which is your home, you are pulling down yourself, and when you are building up you are building up yourself and neighbor. Try and banish from your mind the idea that all good things are away off in some other locality. Give your town all the praise it can legitimately bear. It will certainly do you no harm and will cost you nothing.—Ex.

WORLD HAPPENINGS BRIEFLY TOLD

Canada was the principal country with which the United States traded in June, leading all the other countries in both exports and imports.

Erich Remarque, author of "All Quiet on the Western Front," may be the recipient of the next Nobel prize for literature. It was reported from Stockholm.

The British Columbia Government recently announced the distribution of liquor profits amounting to \$582,619.45 covering the six-month period ended March 31.

The first repercussion of the small crop in western Canada was felt at Sarnia, when the John Gooding Threshing Company reduced its operating staff by one-third.

Hon. Aubrey Morrison, Chief Justice of British Columbia, was among those who received the degree of doctor of laws at the convocation exercises at Dalhousie University, on August 26.

Closer co-operation in air transport matters throughout the world began between Great Britain and France, was discussed at a meeting of Lord Thomson and Laurent Eymac, respective Ministers for Air.

Miss K. Blouinfield, 24, is the first woman in the state of Victoria, Australia, to gain an air pilot's license. She has passed her final tests. They were pretty severe ones at that—with flying colors.

The Graf Zeppelin's flight from Friedrichshafen brought forth a \$200,000,000 project for regular German-Japanese air service with terminals in each of the three countries. It was announced that plans for the scheme are completed.

Sir Frederick Williams-Taylor, of Montreal, general manager of the Bank of Montreal, has resigned to assume the position of vice-president of the bank. H. B. MacKenzie, formerly assistant general manager, succeeds Sir Frederick as general manager.

Big Jamboree Over

Many Friendships Made At Gathering Of Boy Scouts

Tens of thousands of boys trekked out of Arrowe Park, England, when camp was broken and the great world jamboree of Boy Scouts came to an end. Fifty thousand boys left for their homes in nearly fifty different countries.

The previous night was passed largely in leave-taking as big contingents of boys toured the camp and bade their comrades farewell. At dawn they began passing through the park on their homeward journey to far countries of the earth. They took with them the farewell message from the chief scout issued before he left the camp, the keynote of which was "From now on the scout symbol of peace is a golden arrow."

The total number of visitors was 214,422. The next jamboree will be held in 1933. The place will be determined at a conference to be held at Salzburg, Austria.

Development Of Peace River

Country Has Gone Ahead Rapidly In Last Few Years

The first shipment of grain out of the Peace River District, was made up of three cars of wheat hauled by team 85 miles from Vanessa to Reno. There were no highways of telephones, and only two small rural schools then. Today, there are 1,650,000 acres under cultivation, with a prospective crop of 15,000,000 bushels. Population has increased from 3,000 to 50,000; there are schools, churches, flourishing stores, elevators, electric light plants, highways and telephones.

The farmer may hatch his chickens by electricity, raise them using electric light instead of sunlight, and finally fry them for the table by the use of an electric range.

Church At Jasper Is Soldier's Monument

Gift Of English Lady-In-Memory Of Her Son

Unique among the churches of Canada is the little church of St. Mary and St. George, of Jasper, which was consecrated recently by the Bishop of Edmonton. The building, a beautiful structure of stone and stucco, with a tiled roof, was built at a cost of \$17,000 from a design by A. H. Calkerton, of Edmonton, and is a gift to the parish from a lady in England who wishes her name to remain anonymous.

It was presented in memory of her son who was killed in war, and beneath the corner stone, which was laid last year by His Excellency The Governor-General, lies the testament which was found on the young man's body when he was carried out of "No Man's Land." The furnishings and fittings of the church were also the gift of the unknown donor, while the bell was presented by Viscount Willingdon.

May Kill His Art

Russian Who Makes Pictures In Human Hair Deplores Bobbed Fashion

G. Boruchoff, the Russian artist who has received a certain distinction for his pictures in human hair, fears that the bobbed hair fashion may kill his art. He needs long strands for his work, and the supply of them is becoming shorter, and shorter. At first glance Boruchoff's pictures are said to be indistinguishable from oil paintings. He blends the various shades of hair on his palette as an oil painter mixes his colors. His canvas is a piece of silk or linen cloth, and his brush a fine knitting needle. His method of weaving the hair into the cloths, he says, is similar to that used in making the famous Gobelin tapestries. Boruchoff started producing his pictures at 10 years of age when apprenticed to a hairdresser, and while a war prisoner in Germany he spent his leisure in practice.

Flattering plaited skirt is such an attractive fashion for growing girls of 6, 8, 10, 12 and 14 years, as seen in Style No. 605 with flat neckline and simple bodice with neckline trimmed with plaited collar. Long sleeves also have turn-back plaited cuffs. Neckline and hipline bows show feminine influence. Printed dainty in red and white with bows and so inexpensive. Gingham check in printed voile in brown and white with brown velvet bows, maize shade in shantung with bows omitted, and sports weight linen in orchid shade with white-organza plaited collar and cuffs are dainty and practical suggestions. It can also be made with short sleeves as shown in small back view. For early Fall, it will be delightfully smart, made of navy blue wool crepe with vivid red crepe de chine plaited collar and cuffs. Pattern price 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

A Long 'Phone Call

Woman In London Speaks To Hospital In Sydney, Australia

A conversation between a Hampshire widow and the matron of a Sydney, Australia, hospital, marked the first time that a private telephone has bridged the 13,000 miles between London and Sydney.

Jack Sigrist, 18-year-old cadet on the "Valencia" now in Australian waters, was calling for his mother in delirium and, although radio telephone connections between London and Australia are still in the experimental stage, the post office department made arrangements so that Mrs. C. G. Sigrist was able to speak to the hospital matron for 10 minutes and learn that her son was improving.

The museum of the American Indian, in New York, grew out of the purchase by George G. Heye of a Navajo Indian shirt.

AN OUTSTANDING EXHIBIT

In his address before the Rotary Club, during the Calgary Exhibition and Stampede, Hon. J. D. McGregor, Lieutenant-Governor of Manitoba, for many years Canada's most outstanding live-stock man, referred especially to the demonstration put on by the C.P.R. Supply Farm, of Strathmore, which emphasized possibilities of good dairy cows. Mr. McGregor said that he considered it to be the best, from an educational point of view, he had ever seen at any live-stock show.

As shown in the accompanying photograph, five cows of various ages were used to emphasize that high production increases profits. Two mature cows and one four-year-old heifer, one three-year-old heifer, and one two-year-old heifer were included in the group. Each of these had finished an official record within five months, and their total production for 365 days was 127,583 lbs. of milk. The first cow to the left, "Strathmore Sylvia-88340" by producing 29,371 lbs. of milk was recognized to be the highest milk producer in Canada to finish an official yearly record during the past year and a half. The second cow, "Belvedere de Kol Ruby-2,632," finished on June 14th, with

27,892 lbs. of milk, and immediately was shipped to Brandon, where she won second prize in very strong competition. Her yearling heifer was first at Brandon, Calgary, Edmonton, Saskatoon and Regina exhibitions, and was Junior Champion at Calgary and Regina.

The next is "Valley Farm Frances-154139." She produced 22,922 lbs. of milk, and 550 lbs. of butter, which is 2,257 lbs. of milk and 225 lbs. of butter more than the best two-year-old record reported in Canada in 1928.

The four-year-old next in line Strathmore Texaline Sylvia-111946, produced 23,836 lbs. of milk and 1,652 lbs. of butter; while the one on the right "Strathmore Lassie Sylvia-130501," as a three-year-old produced 23,568 lbs. of milk and 958 lbs. of butter.

According to the Dairy Commissioner of the Province of Alberta, the average dairy cow in that province produces 3,550 lbs. of 4 per cent. milk. These five cows produced as much as 32 average Alberta dairy cows. Their milk, sold to the Union Milk Co., Calgary, at regular Dairy-men's prices, brought \$3,214.10, an average of \$642.82 per cow. This

Snow Houses a Myth

Few Eskimos Have Ever Seen Or Heard Of One

Eskimos are frequently seen sweating under a powerful sun. The general idea of Eskimos and all inhabitants of the Arctic Circle is that they live in conditions of eternal winter. Quite wrong Mr. Stefansson, the Arctic explorer, has been telling a Cambridge audience. The wildflowers of the Arctic are exquisite, he says, and very few Eskimos have ever seen a snow house—or heard of one except at school!

Inside Information

Science has perfected a tiny camera that can be lowered into the human stomach to take sixteen pictures of the interior department from all angles. This is getting an inside view of the situation. Afterward the pictures may be enlarged.

A weekly airmail service between France and Madagascar will be instituted as soon as the desert route is lighted.

Test For Your Eyes

Normal Vision Sees Objects Clearly Fifty Yards Away

Are you good at judging distances? It is a test of your eyesight you should be able to see a man's eyes at fifty yards; at one hundred yards you may see the buttons on his coat; and at three hundred yards you may just see his face; while the color of his clothes can be distinguished at four hundred yards. Of course, on a clear day, things look nearer than when the day is cloudy.

Larger Production Needed

"Larger production of high quality agricultural goods is what is necessary to Canada if the country is to continue as an exporter of agricultural products," declared Hon. Motherwell, Federal Minister of Agriculture, informally opening Vancouver's 20th annual exhibition.

The woman who has tact invariably knows what not to do.

Light and airy—the flighty blonde.

A Fascinating Subject

Aviation Editor, Of New York Paper, Predicts Wonderful Future For Air Travel

Among the aviation enthusiasts who set no bounds to their confidence in its coming developments is Bruce Gould, aviation editor of the New York Evening Post, who has just published a book with the title "Silly Larking." Before the end of the next half-century, he believes, the world will have entered the air age with workmen flying to their work "as new they motor." Gigantic flying boats carrying a thousand passengers will then cross the Atlantic so fast that the passenger will be aware of their speed "only by the fact that he can go to sleep one night in New York, and wake up in London or Paris the next morning." If his destination should be inland, smaller aircraft, or perhaps autogiros capable of landing him on the roof of his apartment or in front of his door, will be used to complete his journey.

The future of aviation is, indeed, a fascinating subject that few are qualified to forecast with any real knowledge as a basis for their prophecies. That matters little, however, for Edison was an authority on electricity when experimenting with incandescent lamps, moving pictures, talking machines and a few other of the commonplaces of today. Yet fifty years ago neither he nor any one else could have foreseen the modern development of his inventions. So it is with what the future holds for the airplane.

Far be it from us to suggest that these Utopian dreams may not materialize. Faith and not skepticism rules the scientific world, and the present epoch shows clearly enough the facility of holding that there is any limit to man's ingenuity in conquering air and space. But we must admit that we are not yet entirely convinced that the next fifty years will find airplanes quite as safe and so general or of such tremendous size and speed as Mr. Gould would have us believe.

It may be that his enthusiasm of a little too strong for those of us who perform still have our feet on the ground. For instance, in his panegyric on the joy of skyfaring, when "the clean wind plucks at the heart-strings and gets them throbbing to some strangely satisfying musical music of the spheres," he forgets one thing. Some people get air sick—St. Thomas Times-Journal.

Victim Of June Blizzard

Lost in a blizzard that howled down out of the Arctic on June 21 last, Bruce McKay Christie, Bathurst Inlet trapper, was frozen to death. His faithful husky dog was discovered alive by the search party that set out on the trapper's trail after the blizzard had spent its force and is now at the Royal Canadian Mounted Police northern headquarters at Herschel Island. Christie's body was buried at Bathurst Inlet.

Too uppish—the highbrow.

WINDOLITE

MADE IN ENGLAND

The Improved Glass Substitute

COMES WITH A MESSAGE OF HEALTH

THE sun is the all-powerful life producer. Nature's universal germ destroyer, as well as stimulant and tonic. WINDOLITE is the sun's most important ally.

Medical research has definitely proved that from the point of view of Health and Hygiene, the most effective among the sun's rays, are the Ultra-Violet rays, which possess the greatest power for the prevention and cure of disease and debility.

Science has further established that ordinary window glass does not allow the passage of Ultra-Violet rays, so that by using glass we are artificially excluding these vital health-giving rays. Therefore, the invention of WINDOLITE has completely satisfied the long-felt want. Exhaustive experiments have conclusively proved that it is a most effective substitute for glass, that it freely admits the Ultra-Violet rays, and that its use has a most beneficial effect on the growth and development of plants and chickens and on the well-being of cattle, enabled for the first time to have healthy light instead of darkness in their sheds.

Indeed, the discovery of WINDOLITE has during the last six years completely revolutionized gardening, given a new stimulus to poultry breeding, increasing the egg-laying capacity and fertility of chickens, has greatly improved the health of calves and is now being used in domestic and household requirements.

WINDOLITE stands for 100 per cent. sunlight. It makes light but strong windows for cattle sheds, dairy stables, poultry houses, brooders and all gut buildings. It is economical, unbreakable, flexible and is easy to cut and fit. It is now being successfully used for sunrooms, verandahs, schools, factories, hospitals, sanitariums, hot beds, plant coverings and greenhouses. It keeps out cold—will not crack or chip—cuts with an ordinary pair of scissors and is easy to fit. WINDOLITE is supplied in rolls any length but in one width of 36 inches only. A square yard of WINDOLITE weighs about 14 ozs., while a square yard of glass of ordinary thickness, weighs about 135 to 140 ozs. The improved WINDOLITE requires no varnish. WINDOLITE is made in England.

Price \$1.50 Per Square Yard, f.o.b., Toronto.

The Singing Fool

By HUBERT DAIL

Copyright, 1928, Warner Bros. Pictures, Inc.

SYNOPSIS

Al Stone, the singing waiter at Blackie Joe's New York night club, has written a love song to Molly Winton, but she treats him disdainfully because he is only a waiter. Finally he goes to the floor and renders the ballad himself, hoping to touch her heart. Marcus, the famous Broadway producer, is in the audience and offers to buy the song. Molly makes up to Al, so the latter insists that Marcus hire Molly to sing the number in one of his revues. Marcus agrees. Grace, the little cigarette girl, is heart-broken when she finds Al is leaving, for she is deeply in love with him. Al and Molly marry and both score successes on Broadway. Once Al visits his old friends at Blackie's and Grace is delighted to see him. Then he returns to Molly's dressing room in a Broadway theatre. She is with his friend, John Perry. Al does not see John surreptitiously press Molly's hand as all three leave together.

CHAPTER X.

They descended the elevator from the Manhattan Roof Theatre to the street, where Al looked around for a taxi. John Perry, following after, took Molly's arm, guiding her through the dense after-theatre crowds toward the curb.

Broadway was at its best, two wide currents of human beings moved compactly up and down beneath the brilliant canopy of lights from electric signs. There was romance in the crowds, and power, and feeling of dreams carried from the theatres that dotted the Street of Lights. There were shrill cries for taxis, the giggles of girls leaning on the arms of their escorts, the piercing whistle of the traffic cops stopping and starting the never-ending line of motor cars as the lights went from green to red, and back again. A happy, carefree spirit distinguished the crowd. But Molly turned, bored eyes on this fantastic display of modern Babylon as she waited impatiently for the taxi.

"Why doesn't Al hurry and get one?" she inquired petulantly of John Perry.

"Steady, sister. He's doing the best he can," answered Perry.

But now a taxi driver saw Al's beckoning hand and swung up to the curb. They piled inside and the driver sped away toward the palatial skyscraper apartment in the fifties where Al and Molly lived. Molly snuggled down between the two men.

"Al," she remarked after a moment, "why do we always have to travel in taxis? Why can't we have a limousine and a chauffeur of our own. Everybody else does."

Al did not notice the complaining note in her voice. "I've been thinking that same thing—we can swing it easily now. Tomorrow you can pick one out. What kind?"

"I was thinking of a Rolls-Royce," said Molly eagerly.

Al hesitated and Perry gave a little laugh.

"Nothing cheap about Molly," said the racketeer.

It's bound to mean the greatest happiness in the world to both of us. Don't you see that?"

"No, I don't. I see that it will ruin my career. I'll have to leave the show in a little while and while I'm gone Marcus will get a new ballad singer. People will forget me by the time I'm ready to come back. And how do I know Marcus will give me back my job? I have the best spot in the show now. Your point of view is just plain selfish, because the whole thing doesn't affect you. But I see the other side."

Al stared at her bewilderedly for a moment. Then he said quietly:

"Molly, your nerves are on edge or you wouldn't talk that way. You don't have to be afraid—Marcus will always put you in as his headliner. He knows I wouldn't write another song for him if he didn't. But he wouldn't think of giving you the go-by, anyway. He knows what an attraction you are."

Al paused to regard Molly with a reassuring smile, but she did not see it. Her eyes were fixed somberly upon the floor.

A helpless look passed across Al's face.

"As for my being selfish," he said humbly, "well, perhaps I am. But I don't mean to be. I simply adore you, Molly, and it would give me the greatest happiness I can think of for us to have a child. It would make all we have achieved seem worth while."

Molly rose wearily. "I'm going to bed."

Without kissing Al good night or even looking at him, she walked slowly toward her bedroom, her head dejectedly forward. He heard her bedroom door slam sharply.

Instead of going to his own room and undressing Al lit a cigarette and paced the floor. At first he was agitated and worried about Molly. But gradually he argued himself out of the disturbed state of mind. After all, it was natural that she should be upset. Perhaps the strain of her nightly performances was too much for her. In the morning this cloud would pass from her.

He finished his cigarette, put out the lights and went to the drawing room window, where he could look on the yellow glow from the city lights.

As he stood by the window, dreaming, meditating, already planning the future of the child that was to be long to him, he heard the tinkle of the phone in Molly's room. Her door must have opened for he heard Molly's faint voice:

"No, no. You mustn't call me." Because Molly hung up. Al thought he caught the word "John." But no, he must have been mistaken. John Perry wouldn't be calling up at this hour.

(To Be Continued.)

Broadcast Sensations Of Parachute Jump

Man Started To Talk At Height Of 10,000 Feet

The sensations experienced by a parachute jumper were broadcast from Roosevelt Field, New York, by Henry G. Bushmeyer, while he was plunging to earth from a height of 10,000 feet. It was believed to be the first experiment of its kind.

Bushmeyer carried a 24-pound short wave transmitting radio set strapped to him, and held the microphone in his hand. When he stepped off his airplane 10,000 feet up, he started to talk into the " mike" and the words were picked up on the field by a short wave set, transmitted to the New York studio of the National Broadcasting Station, and then sent out over a network of stations.

If one he troubled with corns, he will find in Holloway's Corn Remover an application that will entirely relieve suffering.

Judged By Newspaper

No one can deny it. A city is also judged by its newspaper. If its newspaper has a standard in its treatment and display of news, in its features and in its editorial column, these facts soon make their impression. If the newspaper is insufficient, the city will suffer. No institution has a more serious relation to a city's reputation than a city's newspaper.

After Two Years

A bottle thrown overboard from the liner "Celtic" in July, 1927, has been found at Rochford, France, after two years' bobbing over the sea. It had been tossed overboard at its point between New York and the Azores, and the Gulf Stream had carried it across the Atlantic.

Some desert plants contain water which travellers find useful in quenching their thirst.

Minard's Liniment for Neuralgia.

Plan Nation Wide Broadcasts

Canadian National Railways Have Ambitious Program Mapped Out

"That the next twelve months will see the greatest advance in broadcasting in Canada that has ever taken place since the commencement of the art a few years ago" is the prediction of W. D. Robb, vice-president, Canadian National Railways, in whose department radio is included. "Two major factors will bring this about," continued Mr. Robb. "The extension of regular weekly schedule of network broadcasting on a national scale, and a marked improvement in programmes generally, and especially by providing more opportunity for Canadians to hear outstanding talent from their own country."

"I can only speak for the Canadian National Railways, but as the nation's greatest broadcaster, now operating thirteen stations and owning the only system of wires adapted for broadcasting under one direction stretching from Coast to Coast, we are planning to institute marked improvements ourselves and to co-operate in every way possible to assist other broadcasters in doing similarly. Commencing in October, we are planning to extend our National network three times weekly from the Maritimes to the Rocky Mountains, and once or twice from Atlantic to Pacific."

"These regular weekly national broadcasts should go far to create a better mutual understanding among the provinces, unite more closely the elements and interests within our country and remove the feeling of isolation felt in not a few communities."

Making Long Trip

Party From Jasper Covering Historic Fur Trade Route In Specialty Constructed Canoe

With a specially constructed canoe, "Curly" Phillips, well known guide of Jasper National Park, is taking a party of five Americans from the east on a thirteen hundred mile trip through the waterways of the north country, commencing at Summit Lake behind Prince George, B.C., and ending at Watways, Alberta, on the Athabasca River. The party will cover the historic route of the fur traders by which many of the early travellers into Western Canada, during the first half of the last century, reached the Pacific Ocean.

KEEP CHILDREN WELL DURING HOT WEATHER

Every mother knows how fatal the hot summer months are to small children. Cholera, infantum, diarrhoea, dysentery, colic and stomach troubles are life at this time and often a precious little life is lost after only a few hours illness. The mother who keeps Baby's Own Tablets in the house feels safe. The occasional use of the Tablets prevent stomach and bowel troubles, or if trouble comes suddenly—as it generally does—the Tablets will bring the baby safely through. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Variety Is Right

E. Olney, of New London, Ohio, believes in variety in settlers' effects brought to Canada. He cleared customs at North Portal, Sask., with a Red speed wagon containing household goods. On the trailer he carried a small menagerie, consisting of two raccoons, two guinea pigs, and a badger. Mr. Olney will locate on land at White Court, Alberta.

Muscular Rheumatism Subdued.—When one is a sufferer from muscular rheumatism he cannot do better than to have the region rubbed with Dr. Thomas' Electric Oil. Let the rubbing be brisk and continue until ease is secured. There is more virtue in a bottle of it than can be fully estimated.

Keeping a Sound Body

If thou wouldst preserve a sound body, use fasting and walking; do a healthful soul, fasting and praying; walking exercises the body; praying exercises the soul; and fasting cleanses both.

Germany is developing its natural parks.

Little Helps For This Week

"Thy kingdom come"—Matthew vi. 10.

Thy kingdom come with power and grace
To every heart of man;
Thy peace, Thy joy, Thy righteousness,
In all our bosoms reign.

—Charles Wesley.

Thy kingdom of heaven is not come when God's will is our law; it is come when God's will is our will. While God's will is our law we are but a kind of noble slaves; when His will is our will we are free children. Philonon had gone forth to see the world, and he had seen it; and he had learned that God's kingdom was not a kingdom of fanatics yelling for a doctrine, but of willing, living, obedient hearts.

—Charles Kingsley.

Priceless Relics Preserved

Sweden Has Richest In World Protected By Laws

Sweden's prehistoric relics are the richest in the world, and this is because the same race has inhabited the country for about 15,000 years, says Professor Curman, State Antiquarian. The scientific museums of Sweden contain more than half a million treasures of antiquity. The structure of the landscapes, with patches of fertile soil lying among barren areas, thick forests or craggy hills, has also helped to preserve these materials of ancient days. These natural obstacles have kept farmers from encroaching upon the sites where prehistoric tombs, fortifications and Viking runic stones have been hidden. Moreover, the Swedish Government realized 300 years ago the importance of preserving relics of antiquity and enacted laws to that end.

Night Congest Traffic

A western town is strong for apathy first, having a bylaw which reads, as follows: "When two cars come to a crossing both shall stop and neither shall start until the other is gone." If this is carefully observed, there will be few collisions, but some slight traffic congestion may result.

A Valuable Seed Pod

Price Of Rare Orchid Is Estimated At \$150,000

Probably the most valuable flower seed pod in the world was recently on display at the Chelsea Flower Show, London, England. A single flower sprang from one of the seeds sold for more than \$1,500, and others sold for \$1,000. It is estimated that the entire pod with seed is worth \$150,000. The pod is the fertilization of a rare orchid, the *Milopha Armstrongii*.

A commercial fertilizer plant to cost \$7,000,000 is to be built at Trail, British Columbia.

Higher education in Canada is carried on in 23 universities and 85 colleges.

WHEN a cold or exposure brings aches and pains that penetrate to your very bones, there is always quick relief in Aspirin. It will make short work of that headache or any little pain. Just as effective in the more serious suffering from neuralgia, neuritis, rheumatism or lumbago. No ache or pain is ever too deep-seated for Aspirin tablets to relieve, and they don't affect the heart. All druggists, with proven directions for various uses which many people have found invaluable in the relief of pains and aches of many kinds.

ASPIRIN

Aspirin is a Trademark Registered in Canada

Reduce the Acid

Sick stomachs, sour stomachs and indigestion usually mean excess acid. The stomach nerves are over-stimulated. Too much acid makes the stomach and intestines sour. Alkali kills acid instantly. The best form is Phillips' Milk of Magnesia, because it is harmless, tasteless, does neutralize many times its volume in acid. Since its invention, 50 years ago, it has remained the standard with physicians everywhere.

Quality Merchandise

Children's Sweaters

Keep them warm the first cool days. Heavy Rope Stitch Wool Sweater Coat, made with a big shawl collar and two pockets. Elastic cuffs and well stayed at points of strain. Comes in Camel and Scarlet, sizes 24 to 32. A heavy coat that is Wonderful Value.

Main Street

Mr. Murray and Mr. C. Finch motored to Lacombe for the holiday.
Mr. and Mrs. H. E. Jones motored to Camrose for the holiday.
Mr. A. White and Ed. Lechelt spent Monday in the City.

Sunday Mrs. T. Coutman left for an extended visit with her daughter in Markham, Ontario.

Miss Wilson of the local Bank staff spent the holiday with her parents in Edmonton.

Miss Dorothy Burton is doing nicely in the Hardisty hospital.

Born to Mr. and Mrs. Sherman Prosser, at Mannville hospital, Thursday August 22nd, a son.

Sunday, September 1st the stork made a visit to the Mannville hospital when it left a son for Mr. and Mrs. Earl Guy.

Mr. O. A. Vinjerud, formerly of North Dakota has opened a watch and jewelry repair shop on the East side of Main street, north of the fire hall.

Mrs. J. W. Bateman of Edmonton has been spending a week in Irma visiting friends.

Mr. M. M. Cook and family returned to Calgary Wednesday after spending a couple of weeks with Mr. and Mrs. J. H. Elliott at Irma.

Eileen Geeson received word that she received first class honors in the introductory examinations Toronto Conservatory of Music.

Mrs. W. J. Moore of Vermilion returned home Saturday after spending a week with Mr. and Mrs. Reed at Irma.

Miss Maude Smallwood has passed her probationary period successfully and has entered as nurse in training at the Royal Alexander Hospital, Edmonton.

Mr. Karman, shoemaker at Wainwright who has been doing a lot of repair work for readers of The Times has secured a new set of shoe repair machinery and is again open for business in Wainwright, and will be pleased to see any of his old patrons.

George and Marguerite King left for their home in Regina, Sunday after spending their vacation with the grandparents Mr. and Mrs. W. H. King.

Threshing is general at present in the Irma district. In most cases the crop is disappointing, turning out 75 to 50 per cent. of what was expected. While the yield is light the grade is running around two straight for most of the wheat. Another week will see most of the smaller farmers threshed but some of the larger operators who are not through cutting yet will be longer in getting their grain threshed.

Ladies Aid of the United church will meet at the home of Mrs. James Fenton on September 12th. Everyone come.

Here and There

(203)
Quebec city's new grain elevator will be completed in January, it is now thought. All that remains to be done to the 2,600,000 bushel structure is to complete the three galleries and the marine tower.

A Chicago Holstein breeder has made a special offer to B. H. Thomson of Braeburn Farm, Bohara, Saskatchewan, for his world champion Holstein cow, Canary Korndyke Alcantara, but representations are being made to the Provincial Government to have this famous animal retained in the province.

"You don't have to sell the idea of game protection and conservation to sportsmen," said James W. Stuber, well known sporting writer who attended the recent banquet in Montreal of the Quebec Association for the Protection of Fish and Game. "The problem is to convince the settler and guide in the backwoods that a surplus of game for the attraction of the hunter means money to their pockets and a source of revenue to many classes in the community."

The Santa Claus team of fairy reindeer must be having an exciting time these days in keeping pace with modern delivery methods, for Christmas presents shipped by Canadian Pacific Express are being speeded through the clouds by airplanes. Between Quebec, Montreal, New York, Ottawa, and Toronto in the east and Winnipeg, Regina, Calgary, and Edmonton in the west, airplanes have been busy this season carrying air mail and express matter and many belated shippers have been able to have their presents delivered before Christmas by using the air express service.

Vancouver is rolling up its bell bottomed trousers in preparation for the four day Sea Music Festival to take place at the Hotel Vancouver from January 23 to 26. The cheery sea chanteys and famous salt water ballads that have been sung by sailors for many centuries will be presented at this novel music festival, which promises to be one of the most popular and important events of the season in the west. It will be preceded by a Yuletide Festival at the Empress Hotel at Victoria when Christmas carols will be sung by well known artists and many quaint old customs will be revived.

WHY BE VACCINATED?

No one denies that smallpox is a disease to which the adjectives "loathsome" may be fairly applied. It is a disease which not only destroys a number of those whom it attacks, but which also permanently scars and disfigures, to a greater or less extent, those who survive the attacks. Before vaccination was introduced, smallpox was a disease of childhood; it was then as common as measles is today. There were very few persons at that time who were not pock marked, and about one death in ten was due to smallpox.

Since the year 1798, when vaccination was given to the world by Jenner, a great change has been gradually effected. In those centres where vaccination has been consistently carried out, smallpox has practically disappeared; in other places where it has not been thoroughly used, outbreaks occur from time to time. These outbreaks, as in the case of the other communicable diseases, vary greatly in severity. Sometimes the cases are mild and few deaths take place; at other times, the cases are severe and a number of deaths occur.

Recent successful vaccination is the only known method by which smallpox can be prevented. Not to be vaccinated is to gamble with a disease to which anyone is apt to be exposed. There are those who say that they will defer having it done until there is an epidemic, but such persons have no assurance that they will not be among the first victims of the epidemic, and that they will not, therefore, have any time in which to secure the protection which vaccination offers. These same persons are also rather selfish, because they are relying upon their neighbors, being vaccinated, and thus indirectly protecting them from the chance of exposure to the disease.

We repeat that recent successful vaccination is the only known method for the prevention of smallpox. Smallpox can be conquered through vaccination.

PRAIRIE CHICKEN SHOOTING

SEASON TWO WEEKS ONLY

Several changes in the game law regulations are announced in the current issue of the Alberta Gazette. A short open season on prairie chicken and partridge is declared effective north of the Red Deer from October 1st to 15th inclusive.

Deer hunting is prohibited in the eastern part of the province, roughly bounded by the C.P.R. railway line from Macleod to Edmonton on the west and the North Saskatchewan river on the north.

A shorter season for hunting Hungarian partridges has been ordered, running from October 1st to November 15th inclusive. It formerly covered the whole month of November.

Tofield To Follow New Plan

Tofield town council has passed its new building bylaw, which was introduced following the recent fire. The bylaw is the standard draft prepared for general use in Alberta towns and will greatly facilitate the work of reconstruction along approved town planning lines.
